

i am writing to express my request that LPFM stations not take priority to current FM translator services. i listen to AIR1 on several of their stations and i feel that they are a tremendous benefit to my community. they bring family values and good clean music to my/our home and cars. it would be a tremendous blow to our community if they were to be removed. in todays age with morals and values going down, it's a great thing to have music that kids will listen to and recieve positive reinforcement and values from. it has benefited my family tremendously and i dont want to see it go. thank you for your time and consideration on this important family matter.
